

Drain4you

The perfect bathroom

A wonderfully salutary room. Where you can slow down and rinse away the stress of the day. Where light, bathroom fixtures and accessories are completely harmonised with each other and form one whole. A room in which Drain4you is done full justice. Beauty of a different dimension that will elevate your bathroom to a higher plane. And that has definitely shifted the standard in bathroom design.

Calm rippling water

Drain4you is not just irresistibly beautiful but also extremely functional. Drain4you is installed at the lowest point in your bathroom floor and allows the shower water to drain away to one side. Drain4you can be supplied as a wall drain, corner drain or door drain and, therefore, there is always a solution that will directly fit with your personal preferences and the options of your bathroom.

Drain4you

The new standard is to shower without thresholds

Drain4you is, with an installation height of barely 6.3 cm, the narrowest drain ever and puts a stop to the water ballet that showering without thresholds used to be. Thanks to Drain4you the water will drain away to one side and a regular discharge to a relatively large discharge area will be created. The result? Excellent drainage and a guaranteed dry bathroom floor.

Another significant advantage of this system is that your bathroom floor can easily consist of large tiles and natural stone. This means that the perfect bathroom is at our fingertips thanks to Drain4you!

The most important benefits are the following

- **Luxury design drain**
- **Suitable for floors made of natural stone or large tiles**
- **Tile thickness is unimportant**
- **Easy to clean**
- **Drains can be connected to each other**
- **Standard discharge capacity of 26 l/minute or a considerably higher discharge capacity thanks to an additional trap**
- **Made of 304 stainless steel**
